

CASH

The image shows the front cover of an old book. The cover is made of a light brown, textured material, possibly cloth or paper. It features a decorative border made of a repeating woven or chain-link pattern. In the center, the word "CASH" is printed in a large, stylized, black serif font. The text is oriented diagonally, following the slope of a thick black line that runs from the upper left to the lower right. The book's spine is visible on the left side, showing signs of wear and discoloration. The corners of the book are reinforced with dark, possibly black, material.

The above table applies to ordinary years only. For leap years, one day must be added to each number of days after February 28.

EXAMPLES.—To find the number of days between June 3, 1892, and February 16, 1893. The figures opposite the third day in the first June column are 154; those opposite the sixteenth day in the second February column are 412. Subtract the first from the second product—412, 154 from 412, and the result is 258, the number of days between the two dates.
